THE TREASURE CHEST

Here is an offering of seeds of desirable plants intended to supplement the listings in our General Descriptive Catalog. The seeds are of precisely the same high quality as those in the General Catalog, no distinctions of age, viability, or in any particular that affects culture. A large proportion of the seeds we have ourselves saved at Old Orchard. The remainder come from botanical collectors, specialist growers, or other reliable sources in various parts of the world. The occasion for this separate Treasure Chest folder is that we no longer have room to describe in our General Catalog, all of the kinds that we save or procure, the General Catalog being, for practical commercial reasons, necessarily kept limited in size.

The prices in this list are per packet of seed, unless quotation is directly stated to be for a weight-unit or for a plant.

We regret that we do not have space to describe all the various kinds, but descriptions may be obtained of most of them from standard horticultural reference works, as *Cyclopedia of Horticulture*, *Hortus*, or other books of like nature. Many, too, will be described from time to time in the several good American gardening magazines. While we shall always be glad to answer specific requests for information about any certain kind or kinds, naturally we cannot undertake to give extended descriptions of long lists of species by correspondence.

Please remit with order. All terms and conditions given on page one of our General Catalog apply to orders made up from this present list. Those who receive the Treasure Chest folder are supposed to have already had the General Catalog. If you have failed to receive your copy, let us know, and we shall see that you get one quickly.

MOORESTOWN

NEW JERSEY

Bulbs and Plants are not prepaid. If you want them by mail, add 5% to your remittance for points east of Pittsburgh and north of Potomac, 10% to the Mississippi, and 15% west of the river. This is to cover postage and packing. We shall assume that shipment is desired by express, collect, if no allowance for postage accompanies order.

NOT OUR CATALOG

This folder, our Treasure Chest Offer, is not our General Catalog. It is simply an overflow supplement to it. Most of those who receive the Treasure Chest Folder will already have had the Catalog, but some will not. It is free upon application. Will those who wish it, please ask for a copy. A post card will do the trick. The latest edition of the General Catalog is No. 37. It contains 66 pages and describes interestingly more than 3300 different species and varieties, over 3100 of them flowers (seeds-bulbs-plants), and the rest of them vegetables. 150 of the kinds of flowers are illustrated.

TREE EVERGREEN BLEND

A mixture of seeds of conifers, Fir, Pine, Spruce, Hemlock, Juniper, Arbor-vitae, Cryptomeria. Cypress, Sciadopitys and the like, together with Larch, Yew, Ginkgo. There is a pleasant satisfaction in the sowing of tree seeds, and in watching over the tree-children as they grow into strength and beauty. It is a very tangible way of making dreams come true, and it doesn't take as long as one might think. Special large pkt. 15c, $\frac{1}{4}$ oz. 30c, 1 oz. \$1.00.

HARDY SHRUB BLEND

Seeds of very many interesting kinds in mixture. The various species have different natural germination periods, some coming quickly, others taking months, so don't break up seed-bed too soon. Give them all a chance. This applies to the Evergreens also. Special large pkg. 15c; $\frac{1}{4}$ oz. 25c; 1 oz. 75c.

THE FRANKLIN TREE

The blossoms are big cups of immaculate whiteness, thick, crispy, waxy petals, the whole centered with a golden tassel. In bloom all through late autumn. As the flowers fall, the foliage becomes scarlet. A small tree or large shrub. Rare. Botanically *Franklinia alatamaha* (or *Gordonia pubescens*). 3 seeds for 25c; 14 for \$1.00.

LILAC or TRUE SYRINGA

We offer a blend of the lovely large-flowering Hybrid or "French" Lilacs. Immense trusses of blossoms, double or single, in white, pink, lilac rose, blue-violet, silvery blue, purple, claret and crimson. Mostly fragrant. Seeds saved from fine sorts; should produce rare beauties. Lilacs, by the way, grow rather readily from seed, and seedlings will often give a truss or two of bloom by the third year. Seeds sown in open ground seed beds or frames in late autumn or during early winter, will germinate strongly the next spring. Seeds sown outside in very early spring, will, if soil keeps cool, usually sprout within a few weeks. Should soil temperatures become too high, though, such seeds will sometimes lie dormant until the following spring. Lilac-time visitors at Old Orchard will know what this seed can produce, for we have a group of splendid seedling Lilacs there. Pkt. 20c; special pkg. 50c; ¼ oz. \$1.00.

THE INDIGO SHRUB

From North China comes the rare and graceful *Indigofera Potanini*, with its long profusion of lovely lilac-rose flowers. Full hardiness. It was from one of the *Indigoferas* (indigo-bearers) that the dye came. Pkt. 15c; ⅛ oz. 25c; ¼ oz. 40c; 1 oz. \$1.35.

GIANT BEARDED IRISES

Here we offer a splendid selection of the world's finest Giant Hybrid Bearded Irises. We have paid scant attention to date of introduction, but much to the actual intrinsic garden merit of the variety, whether it be new or old. New introductions are necessarily high in price until a quantity of plants has been produced of them,—they may, or may not, be better than older sorts that have now become plentiful at lower rates. We have included no kind simply because it was new, we have discarded none simply because it was old. Our intent has been to choose the most garden-worthy kind in each color grouping, seasonal section, and height and use class, without regard to other factors. Another person might judge them differently, nor is our own choice necessarily final, for it is based only on those kinds that we have grown or seen. It will be modified as future occasion may warrant.

Prices are for good, strong divisions. Bearded Iris plants may be moved any time from early April to late October.

NEW AVALON IRIS OFFER—One each of these seven fine Old Orchard seedlings, Avalon White, Burning Topaz, Gold Dictator, Mercutio, New Regent, Veiled Lady, Lura, \$1.65 separate totals, for \$1.35 in the collection.

OFFER OF THE 48 IRISES—We will send one each of the 48 Irises described above, each with label, total of values \$9.40, for \$7.25.

MIXED GIANT HYBRID IRISES—For those who want fine Irises, but do not care particularly about the names, we will send ten plants, each different, no labels, for \$1.00. For 25 Irises, each one different, no labels, the price will be \$2.25. Varieties will be selected from the kinds described here, or will be ones equally garden desirable. Not more than 25 kinds will be allotted to this offer, so if you want more than 25, you will get 2 or more of some sorts. We will send 3 each of 25 different kinds, without labels, for \$6.25. These offers are for express shipment. If desired by mail, add extra for postage and packing.

FOUR FINE APOGON IRISES

TORNADO—Whirlwind stipplings of brown-mahogany over cream and russet. An unusual hybrid of Irises *Forresti* and *chrysographes*. Each 50c.

DAWN BLUE—It is as close to a pure azure as may be found among Irises. An extra good Sibirient Hybrid. Each 30c.

EURASIAN—Odd blendings of buff, tawny silver, chestnut and mahogany. Medium-size flowers with long, flowing falls. Another excellent *Forresti-Chrysographes* Hybrid. Each 40c.

VELVET IMPERIAL—Flowers that are all in the richest and darkest of velvety purples. A splendid Sibirient Hybrid. Each 30c.

NEW APOGON IRIS OFFER—One each of the four new Irises above, our introductions, for \$1.25.

THE SEDUMS

A rock garden without them would be salt without savor, as unlikely, and as little to be desired. The mixed border will need them, too, at least the taller of them, and others will do for edgings, corner-fillers, terraces, porch boxes. Wish we had room to describe each of them, but we have not; that's why we offer them in collection form as well as individually, and if you will tell us when you order, the use to which you want to put the assortment, we will try to select kinds that will fit well into that particular place. Of course if you have access to Bailey's *Hortus* (a book that no real gardener should be without, see our Special Book Offer), you will find most of the kinds pretty well described.

SPECIAL SEDUM SEED OFFER—One pkt. each of the 34 Sedums so offered, for \$4.00.

NOTE PLEASE. Sedums are offered as divisions, Sempervivums as separate rosettes.

THE SEMPERVIVUMS

They live with rocks in sunburned, full-drained places, and thereby suggestion for the hot, dry rock garden. They are delightful from the beginning, more so as the years roll by, for they increase amazingly and endure interminably.

SEMPERVIVUM arachnoideum pkt. 20c; arenarium (plants each 15c, 3 for 40c, 10 for \$1.15); atropurpureum pkt. 15c, 3 for 40c, (plants each 40c); canescens (plants each 20c); Gamma pkt. 20c, (plants each 25c); roseum pkt. 15c, 3 pkts. for 40c, (plants each 15c, 3 for 40c, 10 for \$1.15); rubicundum (plants each 25c); Segueri pkt. 25c, (plants each 25c); Silver Queen pkt. 20c, (plants each 25c); tomentosum (plants each 20c, 3 for 50c); tectorum (plants each 10c, 3 for 25c, 15 for \$1.00); triste (plants each 15c, 3 for 40c, 10 for \$1.15); violaceum pkt. 15c, (plants each 15c, 3 for 40c, 10 for \$1.15).

SEMPERVIVUM PLANT OFFER—One plant (rosette) each of Sempervivums arenarium, roseum, tectorum, triste and violaceum, each with label, for 60c.

SEMPERVIVUM PLANT OFFER—One plant (rosette) each of the 12 offered as above, each with label, separate total \$2.45, for \$1.90.

SEMPERVIVUM MIXED PLANTS—Rosettes, including many excellent unnamed seedlings, together with above, supplied in general mixture, no assortment, no labels, 7 for 50c; 15 for \$1.00; 50 for \$3.00. Not less than 7 sold.

SEMPERVIVUM SEED OFFER—One pkt. each of the 7 offered in seed form, for \$1.00.
